Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required to elect a single invention to which the claims must be restricted.

Group I, claim(s) 15-23, drawn to a sorbent..

Group II, claim(s) 24-26, drawn to a method of purifying a particular biological macromolecule.

Group III, claim(s) 27, an ion exchange column.

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claims 15-23 are either obvious or anticipated by Wenzhi (U.S. Patent No. 5,589,069). Accordingly, the special technical feature linking the inventions does not provide a contribution over the prior art, and no single inventive concept exists. Therefore, restriction is appropriate.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In addition to the restriction requirement, the following election of species is required:

Art Unit: 1723

Election I

The species are as follows:

Each zwitterionic group is considered to be distinct species.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: For election I, each of the groups such as claim 23's sulfobetaine is directed to different species.

The following claim(s) are generic: claim 15 is generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The generic claim 15 is unpatentable. Each species is patentably distinct from each other species.

The specification lists the following references in the specification, which would appear to be essential for a proper examination of the application. They include:

- 1) the two references on page 1 of the specification**
- 2) the seven references on page 2 of the specification**
- 3) the nine references on page 3 of the specification**
- 4) the three references on page 4 of the specification**
- 5) the four references on page 5 of the specification**
- 6) the five references on page 6 of the specification**

It would be appreciated if applicant would submit copies of these references with his response to this office action. Such a timely submission would enhance the quality of examination. In addition, if applicant submitted the copies of these references with his response to this office action, no fee would be required.

Any inquiry concerning this communication should be directed to E. Therkorn at telephone number (703) 308-0362.
